

CLEAN & DIRTY WATER PUMP

DWP 1100 INOX

ADVANTAGES

- Submersible water pump with 1100W motor for draining and pumping clean and dirty water up to 35°C.
- Specially designed for pumping water with sand, mud, debris and leaf or plant debris, its stainless steel reinforced structure makes it especially resistant to adverse environments.
- Ideal for emptying swimming pools and pumping water from wells and springs. The pump is prepared for both one-off work and for installation at a fixed point and stationary operation.
- The pump is designed to work either standing on the bottom of the water or suspended by the handle.
- Floating switch specially designed to switch the pump on and off automatically. As long as the switch floats above the pump, the pump will run continuously. When the water level drops the switch lowers and deactivates the pump to prevent it from burning out.
- Capable of pumping water 9.5 m above the pump. Prepared to submerge and pump from 7 m of depth.
- Rotating pumping tube and equipped with different adapters for $\varnothing 25 / 33 / 38 / 48$ mm hoses to adapt to different locations and all types of extraction hoses and tubes.
- 10m long cable to connect the pump safely away from water.

DATA SHEET

Cod.: 50.2164

Power	1100 W
Flow rate	15000 l/h
Maximum working depth	7 m
Maximum water pumping height	9.5 m
Cable	10 m
Protection	IPX8
Weight	5.9 kg

INCLUDED

- Adapter for hoses and pipes of $\varnothing 25 / 33 / 38 / 48$ mm
